

VENKATESH KRISHNAN

AI PRODUCT MANAGER

AI STRATEGIST | MOBILE & CLOUD ARCHITECT

+91 9922436937

| svenkatesh0635@gmail.com

| Denver, Colorado

| [\[LinkedIn\]](#)

COMPETENCIES

- Technical Product Management
- AI Strategy & Roadmap
- System Architecture (Mobile/Cloud)
- Stakeholder Management
- Digital Transformation
- User Friction Analysis
- Cross-Functional Leadership

TECH STACK

Product Strategy

MVP Definition & Scoping
KPI Analysis (Retention, Latency)
User Journey Mapping
Build vs. Buy Strategy
Feature Prioritization (RICE)

AI & Data Infrastructure

LLM Implementation (OpenAI/Llama)
RAG Architectures / Vector DBs
Speech-to-Text Integration
MLOps (Vertex AI, Azure)
Prompt Engineering

PROFESSIONAL SUMMARY

Senior Technical Product Manager & AI Strategist with close to 9 years of experience bridging the gap between technical feasibility (LLMs, Mobile, Cloud) and business viability. Expert in translating complex architectural constraints into high-ROI product roadmaps. Proven track record of deploying AI solutions that reduce operational friction and drive user retention. Transitioning from Engineering Leadership to Product Management to leverage deep technical intuition for strategic business impact.

PRODUCT & ENGINEERING LEADERSHIP

Senior Engineering Lead

Oct '24 – Present

Persistent Systems

Focus: AI Integration for Retail Analytics | **Tech:** Xamarin Android Native, Android STT

- **Strategic Innovation:** Helped Identify a high-friction data entry workflow causing field rep delays; Contributed in building a Voice-Input feature (Speech-to-Text) that reduced time-on-task by ~**3x** and increased daily report completion rates by **15%**.
- **Global Rollout Strategy:** Designed scalable workflows for multi-region deployment (US, Europe, Asia, LATAM), handling accent variability and localization constraints; partnered with local stakeholders to ensure product-market fit.
- **Stakeholder Management:** Contributed in leading the shift from legacy manual entry to Voice-assisted capture, managing resistance from traditional users by demonstrating clear ROI and usability wins.

Engineering Core

.NET Mobile (MAUI/Xamarin)
Cloud (Azure/GCP)
Microservices Architecture
SQL & NoSQL Databases

Tools Proficiency

Product Mgmt
Jira/Agile
Figma
SQL/Data
Python
Cloud Arch
.NET/C#

ε

EDUCATION

M.S. Business Analytics

(Pursuing)
University of Colorado Boulder

PGCert AI & ML

UT Austin / Great Learning
2023

B.Tech./BE

Vishwakarma Inst. of Info Tech
2015

c

CERTS

- Build, Train and Deploy ML Models with Keras on Google Cloud (Official Google Cloud Cert.)
- Natural Language Processing on Google Cloud (Official Google Cloud Cert.)
- Integrate Vertex AI Search and Conversation into Voice and Chat Apps (Official Google Cloud Cert.)
- Text Prompt Engineering Techniques Skill (Official Google Cloud Cert.)
- Machine Learning Operations (MLOps) with Vertex AI: Manage Features (Official Google Cloud Cert.)
- Machine Learning Operations (MLOps): Getting Started (Official Google Cloud Cert.)
- Production Machine Learning Systems (Official Google Cloud Cert.)
- Recommendation Systems on Google Cloud (Official Google Cloud Cert.)
- Agile PM 301 - Mastering Agile Project Management

○

Solution Architect

Apr '23 – Oct '23

NSR Technologies

Client: Enterprise Retail Operations Platform | **Tech:** .NET Xamarin Forms, Bluetooth Module

- **Digital Transformation:** Served as de-facto Feature PM for a Bluetooth-enabled inventory workflow for an enterprise retail platform.
- **Technical Trade-offs:** Partnered with the CTO, SVP of Product to evaluate alternate technical integration paths; prioritized a architecture that enabled adoption without relying on third party libraries.
- **Feature Delivery:** Owned the end-to-end lifecycle from requirement gathering to deployment, bridging the gap between business goals and engineering execution.

○

Lead Software Engineer

Nov '22 – Mar '23

Utthunga Technologies

Client: Fortune 500 Industrial Automation Client | **Tech:** .NET MAUI vs. Angular

- **Execution Leadership:** Led the .NET MAUI parallel workstream for a motor health tool for a global industrial client; operationalized the platform strategy by defining success KPIs (field performance, maintainability) for comparative analysis against Angular.
- **Shared Architecture:** Architected and delivered a unified Drive Control Library to ensure consistent behavior across both experimental platforms, reducing code duplication and ensuring fair evaluation for the best approach for industrial assets.
- **Metrics-Driven Outcome:** Provided the definitive technical performance data that enabled client leadership to select the optimal long-term mobile roadmap for their field engineering workforce.

○

Senior Consultant I

Mar '22 – Nov '22

Neudesic Technologies

Focus: Healthcare & Dietary Supplements | **Tech:** .NET, Azure, DDD

- **Architectural Enhancement:** Led the integration of Domain-Driven Design (DDD) into the Xamarin mobile architecture, improving code maintainability and scalability for the entire team.
- **Healthcare Solutions:** Served as a technology consultant in the healthcare domain, optimizing existing web and mobile applications to meet rigorous compliance and performance standards.

○

Software Lead

Oct '21 – Feb '22

CES Technologies

Focus: Agri-Tech Inventory Management | **Tech:** .NET Xamarin, WebAPI

- **Legacy Migration:** Directed the migration of a legacy inventory management system for a leading agricultural produce manufacturer, ensuring zero downtime during the transition.
- **Technical Documentation:** Established comprehensive documentation standards including flowcharts and architectural diagrams to streamline knowledge transfer and future development.

- AI-900: Microsoft Azure AI Fundamentals
- Modern Android app using Java, MVVM, Dagger2
- Complete Agile Scrum Management + Kanban

Senior Technology Consultant

May '18 – Jul '21

Saviant Consulting

Focus: Multi-Region Consumer Services | **Tech:** Mobile, Cloud, Notification Engines

- **Service Booking Platform (Middle East Conglomerate):** Strategic Member of the team for the ground-up rebuild of a legacy service booking platform. Owned the definition of service discovery funnels and booking flows; led UX alignment to reposition the product as a trusted, scalable platform.
- **Leading US Grocery Operations Firm:** Built the mobile architecture from ground up for a mature web-based order system. Enabled real-time order visibility and push notifications, Created end to end homepage catering for each type of client's business user, Optimized user cart for an enhanced user experience, filling a critical gap in the customer journey and improving order transparency.

Senior Software Engineer

Nov '17 – May '18

Affluent Global Services

Focus: Microsoft Vendor (B2B) | **Tech:** Xamarin.Android

- **Microsoft Engagement:** Worked as an Onsite vendor consultant for the Microsoft Global Delivery Team, developing specialized B2B modules using Xamarin.Android.
- **Module Delivery:** Delivered high-performance mobile modules for enterprise clients, ensuring strict adherence to Microsoft's coding guidelines and architectural patterns.

Senior Software Engineer

Jun '17 – Oct '17

Silfra Technologies

Focus: IoT Water Metering | **Tech:** Android Native, Firebase

- **IoT Product Development:** Spearheaded the development of the "Silfra Aqua Meter" native Android application, interfacing directly with IoT hardware for real-time water tracking.
- **Cloud Integration:** Implemented NoSQL architecture using Google Firebase to handle real-time data streams from IoT devices.

Software Developer

Jun '15 – Jun '17

Channel Bridge Software Labs

Focus: Fintech & Payments | **Tech:** Android Native, OCR

- **Fintech Innovation:** Integrated Optical Character Recognition (OCR) technology into a payment processing application to automate data entry and reduce transaction friction.
- **App Lifecycle:** Managed the complete mobile application lifecycle from development to testing and distribution on the Google Play Store.

I

INDEPENDENT AI PRODUCT STRATEGY ANALYSIS

Based on Executive Assessment by AI Simulation (Nov 2025) – Rated 9.7/10 for Leadership Readiness

Module 1: AI Product Director (Strategic) *Fintech Case Study*

Portfolio & Capital Allocation

- **Capital Allocation Strategy:** Executed a "Growth-Focus Reallocation" for an \$85M AI portfolio under a strict \$5M budget constraint. Cut budget from mature "Cash Cow" products to fuel "Strategic Bets," solving layoff constraints by reskilling engineers.
- **Crisis Leadership:** Managed a critical AI failure event (47 misdiagnoses). Executed a "Safety-First Pause" to protect patient safety while preserving data for root cause analysis, demonstrating ethical courage in a regulated environment.
- **Executive Presence:** Aligned Sales (Q2 launch) and Engineering (Q3 readiness) through a "Pilot-as-Product" diplomacy strategy, securing a paid pilot to satisfy commercial goals while mitigating technical risk.
- **Detailed Analysis:** [View Full Strategic Analysis \(GitHub\)](#)

Module 2: AI Product Manager (Operational) *Consumer/Enterprise*

Product Sense & UX

- **Strategic Trade-off Management:** Rejected a technical fix for a fraud model (92% accuracy) in favor of a business segmentation strategy. Quantified \$600k churn risk vs. \$60k fraud risk to implement a "Priority Tier" for high-value users.
- **Cost-Benefit Pragmatism:** Designed a "Hybrid-Loop" architecture for support ticket automation. Replaced expensive "AI-only" plans with a 90/10 AI-Human split, solving scalability constraints while maintaining unit economics.
- **Product Vision (Spotify Case):** Conceptualized "Soulmate," a voice-first GenAI agent. Designed "Zero-Friction" barge-in interfaces and "Graceful Failure" protocols to prioritize long-term user trust over short-term engagement.
- **Detailed Analysis:** [View Full Product Analysis \(GitHub\)](#)

STRATEGIC AI PRODUCT PORTFOLIO

Selected high-impact initiatives demonstrating end-to-end AI product lifecycle management.

Workforce Agility Engine (Internal Mobility)

Recommender Systems / HR Tech

- **The Business Problem:** High external recruitment costs and slow "time-to-staff" (3-6 months) for growth products caused revenue delays during internal restructures.
- **The AI Solution:** Conceptualized an **Internal Career Path Recommender** using Hybrid AI (Collaborative Filtering + Knowledge Graph) to auto-generate "Bridge Paths" for upskilling engineers.
- **Business Metrics:** Validated an operational model projecting ~\$565k savings per restructuring event and a 70% reduction in time-to-staff, transforming the "bench" into a strategic asset.
- **Repository:** [View Source Code \(GitHub\)](#)

○ Automated Support System (University Scale)

RAG / Enterprise IT

- **The Business Problem:** Seasonal "Semester Surge" of 30k+ tickets overwhelmed support staff, costing senior engineering hours in context switching and operational toil.
- **The AI Solution:** Designed a **Retrieval-Augmented Generation (RAG)** system as a "Tier 0" agent assistant. Prioritized a **Local LLM architecture** to ensure 100% FERPA compliance and \$0 variable cloud costs.
- **Business Metrics:** Targeted a **40% Ticket Deflection Rate** via self-service, effectively reclaiming **~2 FTEs of capacity** annually to be repurposed for high-value infrastructure projects.
- **Repository:** [View Source Code \(GitHub\)](#)

○ Hybrid Energy Demand Forecasting

Time-Series Forecasting / Utilities

- **The Business Problem:** Grid operators face \$20B+ in annual losses due to forecast errors (5-10% MAPE), where under-forecasting risks catastrophic blackouts and over-forecasting wastes millions in fuel.
- **The AI Solution:** Productized a **Hybrid Forecasting Engine** combining **LSTM (Deep Learning)** for accuracy with **Prophet (Statistical)** for explainability. Implemented an asymmetric cost function to penalize "Under-Forecasting" 10x more than over-forecasting.
- **Business Metrics:** Achieved a **50% reduction in forecast error (MAPE)** and projected **\$28M in annual savings** by optimizing "Safety Stock" energy reserves while maintaining 99.9% grid reliability.
- **Repository:** [View Source Code \(GitHub\)](#)

○ Industrial Visual Inspection System

Computer Vision / Manufacturing

- **The Business Problem:** Manual inspection had an 80% accuracy ceiling due to fatigue, risking high-cost recalls (\$5M+ exposure) and brand damage.
- **The AI Solution:** Defined the roadmap for an **Edge-AI Computer Vision System** (CNN-based). Strategically tuned the model for **High Recall (>99%)** to prioritize brand safety and minimize "False Negative" escapes.
- **Business Metrics:** Modeled a **50x increase in throughput** (<100ms/item) and a **95% reduction in missed defects**, positioning the system as a "Brand Insurance Policy" with a 2.7x Year-1 ROI.
- **Repository:** [View Source Code \(GitHub\)](#)

○ Voice of Customer (VoC) Intelligence Platform

Sentiment Analysis / CX

- **The Business Problem:** Reliance on lagging survey data masked "Silent Churn" (only 1 in 26 unhappy customers complain), leaving **\$7.5M in annual revenue** at risk.
- **The AI Solution:** Productized a **Predictive VoC Platform** using NLP (DistilBERT) to correlate unstructured text with Churn Risk. Implemented **Aspect-Based Sentiment** to identify root causes (e.g., "Pricing" vs. "UX").
- **Business Metrics:** Projected **\$750k annual revenue retention** by reducing issue detection time from 14 days to **<24 hours**, enabling proactive intervention (5-7x ROI).
- **Repository:** [View Source Code \(GitHub\)](#)

VOLUNTEERING & RESEARCH

Xiaomi MIUI Official Forum (Beijing, China) | *Super Moderator (Beta Team)*
Oct '14 – Mar '16

- **Community Product Leadership:** Led the Beta Testing Team, prioritizing 500+ bug reports for developers. Acted as a strategic bridge between the user community and engineering, directly influencing feature stability and UX improvements.
- **Team Management:** Recruited and managed a volunteer moderation team; facilitated conflict resolution and ensured adherence to forum policies for a massive global user base.
- **Recognition:** Awarded **"Best Super Moderator of the Year 2015"** for outstanding contribution to community health and product quality.

Tata Institute of Fundamental Research (TIFR) | *Research Engineering Intern*
May '13 – May '14

- **Scientific Instrumentation:** Optimized a Multi-Channel High Voltage Data Acquisition System for cosmic ray research. Enhanced PCB reliability to withstand high-altitude environmental variations (temperature/humidity).
- **Data Protocol Analysis:** Analyzed and improved the communication protocol for data transfer between the high-voltage system and logging apparatus, ensuring data integrity for critical scientific experiments.

University of Pune | *Engineering Lead (Final Year Research)*
May '14 – May '15

- **System Architecture:** Architected a TCP/IP-based control system for a **Two Dish Solar Interferometer**. Replaced a legacy control system with a modern Raspberry Pi + Motor Driver solution for precise 80m parabolic dish control.
- **Hardware Design:** Engineered a production-ready PCB with SMD components to handle higher output currents, significantly improving the system's operational efficiency and tracking accuracy.
